Yogesh More

Mern Stack Developer

2 Years 0 Month

(+91) 8850055197

iyogesh.more1998@g
mail.com

Profile Summary

Experienced Developer well-versed in the MERN stack and traditional technologies. Expertise in crafting responsive UIs, proficient in managing state with Redux, and adept at developing RESTful APIs. Demonstrated ability in enhancing application features, prioritizing security, and fostering collaborative teamwork to deliver impactful solutions.

Education

Bsc, 2024

Arunodaya
University

Diploma, 2020

Bharati Vidyapeeth Institute Of Technology (Polytechnic)

Work Experience

Aug 2024 - Present

Mern Stack Developer
EnergiSpeak Analytics

- Design and develop user-friendly dashboards using React.js and MUI.
- Build and optimize scalable web applications with the MERN stack.
- Create interactive charts and real-time analytics using React Chart.js 2.
- Manage and optimize MongoDB databases for performance.
- Integrate Redux for state management and data flow.
- Develop RESTful APIs for efficient front-end and back-end communication.
- Collaboration with designers, product managers, and other developers will be essential to delivering scalable and efficient applications.

Oct 2023 - Aug 2024

Junior Software Developer

Acumen Cognitive Engineering

- In my role as a Junior Software Developer at Acumen Cognitive Engineering, I've built a strong foundation in key technologies such as React.js, Node.js, Express.js, PostgreSQL, REST APIs, and JavaScript.
- Developed software solutions based on client requirements.
- Built and optimized web applications using React.js, Node.js, and Express.js.
- Worked with PostgreSQL to optimize database performance.
- Collaborated with cross-functional teams to enhance application functionality.
- Contributed to feature enhancements and ensured high-quality code delivery.

Internship

6 Months

Book Store

BridgeLabz Solutions

- Developed Employee Payroll Application and Address Book Application with successful outcomes.
- Proficient in developing backend APIs using Spring Boot and frontend applications using ReactJs library.
- Demonstrated expertise in creating responsive UIs using ReactJs and ReacyJs-Material, adept in SQL and proficient in designing navigational structures and search functionality.

Certification

- Bridegelabz Fellowship Program
- Frontend Developer (React) - HackerRank
- JavaScript Algorithms and Data Structures (Beta) - freeCodeCamp
- JavaScript (Intermediate) - HackerRank
- MERN Stack - Great Learning
- MERN full-stack web development course (lifetime + certificate) - 30DaysCoding
